

WHAT IS HEARX SELF TEST KIT?

A tablet-based hearing test solution for diagnostic assessments outside a sound booth. Self-testing with remote support allows hearing professionals to test and make treatment recommendations, including hearing aids. Includes pure tone audiometry, speech-in-noise testing, ear risk assessment, and digital otoscopy.

A TURNKEY LOW- & NO-TOUCH SOLUTION

HOME TESTING

No-touch, quick and user-friendly at-home hearing assessment.

CURB-SIDE TESTING

Offer a low-touch, drive-through hearing assessment service.

COUNTER-SIDE TESTING

Low-touch, quick and easy in-store hearing assessment.

SETUP YOUR CUSTOMIZED BATTERY

PURE TONE AUDIOMETRY

hearTest is a certified (IEC 60645-1), FDA registered pure tone audiometer, used with calibrated headphones, for rapid automated audiometry.

EAR RISK ASSESSMENT

hearRisk includes a proprietary risk algorithm (patent pending) detecting conductive hearing loss with 94% accuracy. Option to add the CEDRA questionnaire for ear disease.

DIGITAL VIDEO OTOSCOPE (ADD-ON)

Use your hardware with the hearScope digital otoscope to capture images of the eardrum and ear canal.

SPEECH-IN-NOISE

hearSpeech measures difficulty understanding speech-in-noise using a binaural digits-in-noise test. MCL/UCL testing included to determine the dynamic reach of patients for hearing aid fitment.

**Data costs for device setup and test syncing not included in the package.*

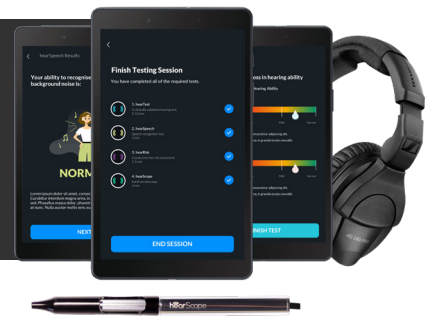

"I love that the hearX Self Test Kit is so accurate and reliable. Hearing care is more accessible and less intimidating now and that just helps more people, which is very satisfying for me as an audiologist" - **STEFANIE WOLF**, Audiologist

BENEFITS & FEATURES

- RISK MITIGATION**
Facilitate initial assessments and direct adult patients for hearing aid fittings with minimal, or no face-to-face contact.
- COST-EFFECTIVE**
Affordable solution to leverage remote and telehealth and offer remote consultations.
- PATIENT REACH**
Hearing assessments on both existing and new patients in ways that work for them to minimize infection risk.
- STEP-BY-STEP GUIDANCE**
Easy-to-follow instructions guide patients through the hearing assessment.
- ENVIRONMENTAL NOISE MONITORING**
Real-time smart monitoring of noise to alert the user of environmental noise concerns.
- CENTRALIZED DATA MANAGEMENT**
Seamless integration to the secure cloud data management system, mHealth Studio Cloud.
- ADJUSTABLE PROTOCOLS**
Customizable screening intensities.
- MOBILITY**
Move the kit around between locations and suitable environments.

TECHNICAL SPECIFICATIONS

Pure tone test frequencies | 0.125 to 8 kHz
Rise/fall time | ~35 ms
Total harmonic distortion | <2%
Test intensity levels | 10 to 90 dB HL

Use this secure cloud portal to enable remote support, patient counselling, assistance and reporting. All test data seamlessly integrates with the secure cloud-based data management system.

MHEALTH STUDIO CLOUD

We received a SOC2 report from A-LIGN
